## Product description

### KL-0121-21 A - Hose clamp pliers with remote control (semi-rigid)

Fits universally for cars and commercial vehicles.

To easily clamp and release spring-loaded band clamps, for example to remove and install hoses for oil, fuel and cooling water. The special feature of these pliers is the semi-rigid design of the Bowden cable. It can be bent into almost any position and remains there, similar to a wire. This makes it possible to reach spring-loaded band clamps even in extremely hard-to-reach places, such as EGR coolers. The automatic retaining function of the pliers holds the spring-loaded band clamp securely in this state after it has been pre-tensioned once.

### Scope of delivery/component overview

Part no.	Description	Qty.
KL-0121-21 A	Hose clamp pliers with remote control (semi-rigid)	1

### Specifications

Spring-loaded band clamp Ø:.....18 ... 53mm  
 Length: ..... 680mm  
 Weight: .....640g

### Safety instructions and regulations

- ✔ **Prior to using** the tool, read and understand all safety instructions and **observe** them for **safe use!**
- ✔ Ensure that maintenance and repair work on motor vehicles is only carried out by trained specialists in specialist automotive workshops, taking into account occupational safety and accident prevention as well as the instructions of the vehicle manufacturer!
- ✔ **Prior to each use**, check the tool **carefully** for damage, loose parts or unauthorised modifications. **Never** use it if you notice any such deficiencies!
- ✔ Use the tool **as intended** and **always** observe the vehicle-specific application procedures in the repair guide of the vehicle manufacturer!
- ✔ **Always** wear your personal protective equipment (for example safety goggles, protective gloves, safety shoes) when working!
